EXPERIENCE

Atomic Jolt, Logan, UT & Remote — *Full-stack Web Developer*

December 2016 - December 2017, October 2019 - October 2021

Built software for various clients using Ruby, Rails and React. Had opportunities to work collaboratively and independently building education software.

Journal Technologies, Logan, UT — *Back-end Web Developer*

February 2018 - April 2019

Primarily did back-end development with Rails. Created and documented APIs which were consumed by both front-end applications and external applications.

B-Stock Solutions, Remote — *Ruby Developer*

July 2015 - September 2016

Independently created internal software tools written in Ruby designed to automate manual tasks involving data manipulation and content generation. Drastically reduced the time needed to complete various responsibilities for myself and other team members.

EDUCATION

Launch School, Logan, UT (Remote) — *Web Development*

February 2016 - July 2017

Studied various languages and tools used in modern web development. Emphasized JavaScript, Ruby and Rails. The teaching philosophy focused on mastering fundamentals of development that do not change such as truly understanding problems and finding correct, quality solutions. Was considered one of the top students during my time there.

VALUES

Being Good
Doing Good
Constant Improvement
Craftsmanship
Joy

PRIMARY TECHNICAL SKILLS

Ruby
Ruby on Rails
RESTful APIs
Automated Testing
Version Control with Git
Thoughtful Design
Clean, Reliable Code
